

TREVOR MAYNARD

Emerging Risk Manager - Lloyd's

Trevor is a Manager in the Emerging Risks Team at Lloyd's. The Lloyd's Emerging Risks Team advises the Lloyd's market of potentially significant emerging risks and recently produced a report on the risks of Nano-technology.

The team hosts a 'special interests group' formed through the Lloyd's Market Association consisting of representatives from managing agents who meet periodically to discuss emerging risks. Trevor was the main author of Lloyd's first paper on climate change "Adapt or bust" and one of the editors of their third paper on 'Rapid climate change'. He is involved closely with the 360 project at Lloyd's which this year is focusing on liability issues for businesses.

Trevor is on the board of the Lighthill Risk Network which is a collaboration between Lloyd's and others in the insurance market which seeks to join up the business world with that of academia. He is a fellow of the Institute of Actuaries and has bachelor and master of science degrees in pure mathematics from the University of Warwick.
